

Hardware You Can Depend On

Industrial Fanless

Small form factor, fanless computers, built for reliability, offering a variety of CPU performance and IO options.

Industrial Actively Cooled

Compact, highly configurable systems with durable all-metal chassis and a wide range of connectivity options.

Rugged Computers

Built for demanding environments with wide temp ranges, wide voltage input, and shock & vibration tolerance.

Panel PCs

Ruggedized all-in-one systems with Intel® Atom or Core™ i CPUs, with screen sizes up to 24" and IP65 bezels.

Edge Servers

Systems with Intel® Core™, Scalable Xeon® or AMD EPYC™ CPUs in 1, 2, & 4U, built for customization.

ARM Computers

Industrial Raspberry Pi Compute Module 4-based solutions for gateway and industrial control applications.
