3.1 CPU, Memory, and M.2 M Key Module Installation

Please follow the instructions to install CPU & memory as below.

- Loosen 7 screws to release heatsink front cover

- Loosen 8 screws for heatsink

- Remove black mylar and CPU socket cover, and follow CPU direction to install CPU.

- Assemble SO-DIMM DDR5 memory to slots

- Assemble M.2 M key/B-M key module to M.2 M key slot

M.2 M Key

3.2 M.2 B Key/E Key/mPCIe Module Installation

- Loosen 7 screws, and move chassis cover as below direction

- Assemble M.2 B key/E key/mPCIe module as below location on the bottom of main board

3.3 PCIe Card Installation

- Loosen 4 screws to release PCIe card holder bracket as red box highlights
- After PCIe card assembly, please adjust bumpers in blue box A to hold PCIe card in Slot#1, and bumpers in blue box B to hold PCIe card in Slot#2 in place

- Loosen 1 screw for PCIe door plate which will be used for expansion card and assemble with PCIe card bracket. Then adjust PCIe card holder to fix the card to resist S&V conditions

3.4 RTC Battery Maintenance

- Preparation for disassembly:

Flathead Screwdriver

(The battery holder is designed for great vibration resistant and harsh environment use, so it needs to use a tool to disassemble the coin battery)

- Insert flathead screwdriver to the gap of one side of RTC battery vertically.
- Rotate the screwdriver at around 45 degrees to loosen the coin battery

3.5 1000W PSU Cable Assembly

- Green, white, and black cables connect to power cords. Red and black cables connect to XM1 terminal block connectors.

***Only experienced electronics personnel should open the PC chassis, or assemble the power supply with power cable connection.**

- Black cables connect to GND, and red cables connect to V+.
